Boost Developer Productivity with a 360-Degree View of Every Software Change by Using FinditEZ, Certified Microsoft Platform Ready for SQL Azure

MICROSOFT AZURE ISV PROFILE: FIND IT EZ SOFTWARE CORP.

Whenever changes are planned or made to the underlying database in any software application, it can be a challenge to find all referenced code that can be affected. Normally, each software layer or programming language would require time-consuming and disconnected analysis with a variety of tools. That is why customers like Sprint, Bloomberg, GE Healthcare and the Mayo Clinic depend on FinditEZ for change impact analysis covering their entire code-stack in a single integrated app.

WHAT WE OFFER

Productivity software for developers.

WHAT IS FIND IT EZ?
A productivity tool for software developers. Global syntax aware search, compare, document, and refactor SSRS, Crystal Reports, SQL Server, Access, .NET, Java, PHP, Excel, cloud database SQL Azure, plus more for complete change impact analysis with a single application.

HOW WILL IT HELP ME?
Find it EZ better manages software change through every phase, from more accurate estimating to cost saving design selection, rapid development, improved code quality, smoother end-user rollout, and expedited critical production support. One integrated package. Change made simple.

SEARCH INNOVATION
Like the "run anything on Microsoft Azure" promise, FinditEZ is designed to improve software change management in any application that is built with a mix of languages, tools, frameworks, or databases. Flexible and cost effective to meet your exact needs with just one tool.

BUILT FOR SQL AZURE
Database developers and admins rely on FinditEZ to pinpoint all referenced code throughout an entire application whenever changes are planned in the underlying data model. Search schema, SQL code, and data in a single pass. Microsoft Platform Ready certified support for SQL Server and SQL Azure.

WHAT OUR CUSTOMERS ARE SAYING
"Our main goal was to find a utility to search Crystal Reports. For the same utility to also have the capability to search the underlying SQL data source was a home run." – Melinda Khorst, IT Consultant, Pan American Life Insurance Group

Microsoft

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS
Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE
Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC
Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE
Accelerate your mobile app development by using a backend hosted in Microsoft Azure. Scale instantly as your install base grows.

MEDIA
Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL
Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE
Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES
Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH
With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
